AMA Chapter #108

February 1994

Issue 139

## 1994 CLUB MODELING PROJECTS

by VP Rod Persons

Begun by past Prez, Brian Ramsey, SAM 27 has had a club building project each year in which members have built specific model types for club fun flies. Our first project was the Gollywock. 13 'Wocks were built and flown by club members. The following year we built 1/2 A Scale models and a SAM-style Concourse perpetual trophy was created that is now awarded each year at our annual Crash & Bash. Then we had Pacific Aces which were popular with our Junior members.

This year we have an ambitious program. In the interest of meeting both the need to keep the young Old Timers active and providing a model that can be used in more than one event, the following projects were adopted to build for fun fly events to be held this spring, summer, and fall:

### Adult Event

Free Flight - Spring & Summer  
Ed Lidgard's "HI-HO"

1. Build it to fly either as a Wakefield or Stick.
2. SAM Rules apply.
3. While 5 minute max applies under SAM rules, max will be set according to field and weather conditions.
4. Juniors are encouraged to fly this event if they so choose.

### Junior Event

Free Flight - Spring & Summer  
"Cloud Chaser"

1. Build to plans supplied by Prez Rocco Ferrario
2. 9" plastic prop to be used. May be extended to 11" with the addition of material added to the tips.
3. 2 minute max flights to apply.
4. 3 flights, highest time wins.

### Old Time Glider

Late Summer  
R/C event for all members

1. Any glider that qualifies under SAM rules anywhere in the world.
2. Builder must supply appropriate proof that model qualifies. If that model is acceptable under another country's rules, modeler must supply reasonable proof of that qualification. This may be a copy of a magazine article, dated plans or similar proof.
3. SAM O/T glider rules apply to construction, wing length and weight.
4. Flight times according to SAM Rules unless field or weather conditions dictate otherwise.

### Suggested Completion Dates

"HI-HO" and "Cloud Chaser": May 7th during our annual Fun Fly.  
R/C O/T Glider: September 29th at our Lakeville flying site.

## Meeting Minutes

by John Carlson

### POST-FLIGHT

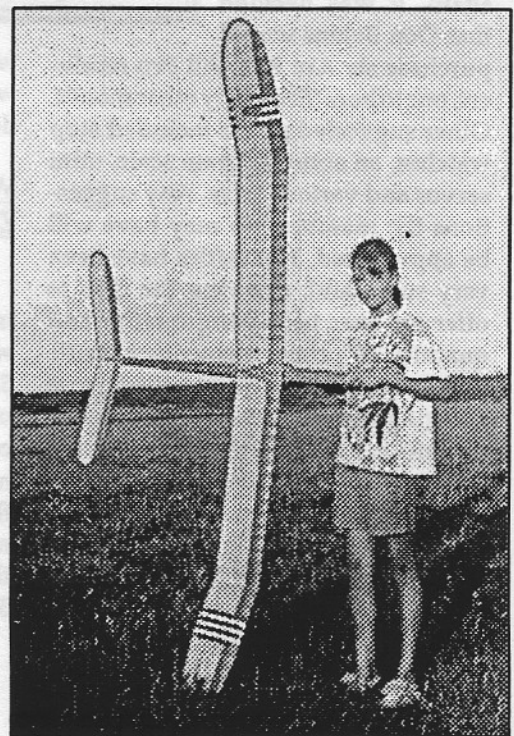

- Old Business -

### JANUARY 1994 MEETING

- Near Attendance Record

A record 32 attended the Novato Fire House meeting, only exceeded by the 38 who went on the October field trip to Ted and Remo's Schellville hangar last year. Among the attendees were new members, Mike Haley and Philip Bates, who joined the Junior OT Group. Welcome, Mike and Philip!

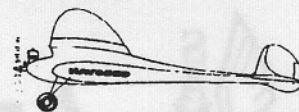

Among the missing was Gene Mathieu who was in the Sonoma Valley Hospital recovering from major surgery. We wish Gene a speedy recovery and hope to see him soon at one of the upcoming meetings.

Rado Cizek photo

*Zehrovice II, an O/T glider designed in 1949 by SAM 27 member Rado Cizek of SAM 95, Czech Republik. This model would qualify for the Club R/C glider project, is easy to build and has an unusual sub-rudder. Shown here by Rado's grand daughter, Petra, at their flying field in Kladno, 30 km west of Prague, Czech Republik.*

### SPECIAL AWARDS

Our new President, Rocco Ferrario, enthusiastically presided and, aided by Don Bekins, presented prior president, Brian Ramsey, with a beautiful gold wire sculpture of an old timer on a marble base as a token of SAM27's appreciation of the accomplishments during his two year tenure as president. Rocco also presented John Carlson, Secretary/Treasurer, a handsome plaque containing the statement: "We couldn't do it without you!" Brian and John were properly flabbergasted and gave short speeches of thanks.

### OLD BUSINESS

#### Raffle Prizes

The subject of raffle prizes was discussed again. It was decided that Don Bekins would purchase six Ace R/C All Pro receivers, one to be raffled every other month. Other suggested prizes included stop watches, an accurate gram scale, mini servos and various tools. Any suggestions the membership may have will be appreciated. The raffles have been very successful, allowing the club to offer an ever increasing quality and quantity of prizes. Remember, raffle tickets purchased or received from bringing your projects for Show & Tell go into the pot for the year end big drawing for super prizes. Thus every member has two chances to win.

### MEETING PROGRAMS

Prez Rocco suggested that, as a regular feature of every meeting, someone should make a short presentation on a subject of general interest such as building tips & techniques, DT systems, fiberglass fabrication, indoor models, Peanuts, covering materials and techniques. To start the program, the February meeting will feature a

presentation of dyeing silk and silkspan by Tim Molsberry and Tim Younggren of the TBT Gang (Tim, Buz, Tim).

### RYAN ST RIDE

Tim Younggren, winner of the half hour ride in the Tex Rankin Ryan ST owned by Ted Babini and restored by Remo Galeazzi has decided that one of the Junior O/T group would benefit more than he. Accordingly the ride will be awarded in the February raffle to any of the Junior O/T members who

for their countries which could then be applied for use in the US. The golden era of old timer designs in the US was in the 1930's to 1942. The rest of the world was deteriorating into the World War II conflict during that time and little modeling was being done. Though there were a few designs created in the early 40's in countries outside the US, their golden era of modeling was following WW II from 1945 to 1950. There are some unique and interesting designs created during that period which were equivalent to the US. designs

during our golden era of modeling. These designs should qualify in the US. The designs from SAM chapters throughout the world could bring the spice of new life to our Bomber/Playboy dominated SAM competition.

We will from time to time publish drawings in the *Antique Flyer* of OT models from around the world which are beautiful and unusual. Don has

a number of Czech and Italian glider plans which will qualify for our club R/C O/T glider project which is to be flown in late September. Please get in touch with him if you are interested in building one of these unique designs.

### ANTIQUER FLYER EDITOR RETIRES FROM ACTIVE DUTY

Ed Heikell, talented Junior member, who took over the editorship of our newsletter from Don Bekins in May 1993, has resigned. Starting college and a career job in photo journalism has left him with little time to continue the terrific job he was doing publishing the *Antique Flyer*. Don Bekins has graciously agreed to resume this task. SAM 27 thanks Ed for the great job he has done including several innovations in format. Also, thanks to Don for taking on this task again. John Carlson will continue writing up the very complete minutes of our meetings which are crucial to delivering a really lively and informative letter to our members.

was a paid up member in 1993. There will be a drawing among that group to determine the winner of the ride.

### WINTER INTERNATIONAL NEW ZEALAND 1/2 A POSTAL MEET

The New Zealand SAM Challenge is again being made to fly during our winter and their summer. Last year SAM 27 fielded a team and placed 2nd out of 14 teams worldwide from five countries. By the time you receive this newsletter, the event will have been flown (February 5th). Ed Hamler organized the SAM 27 team and will have the results for our next newsletter. SAM 56, Kansas, won in 1993.

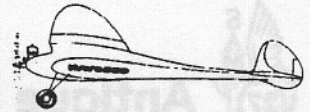

### PROPOSED INTERNATIONAL SAM RULES TO QUALIFY FOREIGN O/T DESIGNS IN THE US

Don Bekins reported that he has been in touch with SAM members in foreign countries to work out a system of qualification for old timer designs

Ron Keil & Playboy Jr. at '93 C&B

### Coming Events

#### FEBRUARY MEETING ROCCO'S CLASSROOM

The February 16th meeting will be held in Rocco's Redwood Middle School (Napa) classroom where many models are hanging from the ceiling and as a diversion, several tanks of tropical fish. After the meeting, the school auditorium will be available for indoor flying. Bring your Peanuts, Phantom Flashes, Mini Sticks, etc. Perhaps our indoor expert, Earl Hoffman, will demonstrate one of his feather-light indoor competition models.

-- See map, page 7 --

#### O/T RUBBER MEET SCHEDULED

Jerry Rocha advised that Saturday, July 16th has tentatively selected as the date for the second annual SAM 27 - AMPS/SAM 32 O/T rubber meet. Events will include P-30, Pussy Cat, Phantom Flash, HLG, O/T Small Rubber, Cloud Chaser and possibly others. The meet will be at the SAM 27 flying site at Lakeville Road. This meet is a qualifier for the Junior O/T Program. Details will be published in a future issue of the Antique Flyer.

#### NCFFC BANQUET

Jerry Rocha and Rocco Ferrario will be attending the February 27th annual NCFFC banquet representing SAM 27. Any others interested in attending call Jerry or Rocco for details. RSVP Roger Gregory, (510) 930-0968.

#### SPRING FUN FLY

A repeat of the Brown's Valley Fun Fly will probably be held in May. More information at our next meeting. Ron Keil has discussed a Fun Fly with his SAM 74 group at their beautiful Clear Lake site. A possible fall date may be arranged. We will be scheduling more non-competition events at which our Juniors can qualify their

models and bring out the rest of our talented O/T builders to fly their creations. There will always be someone there who can act as advisor/instructor for those who need help with R/C stick time and rubber/free flight adjustments.

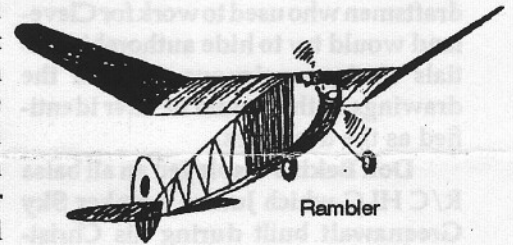

#### MEET SCHEDULE

The 1994 calendar dates for O/T meets, fun flies, and competitions for free flight and R/C published in the January Antique Flyer was the fine work of Jerry Rocha. For those of you who have never attended or flown in an O/T meet, the NCFFC events at Waegell Field near Sacramento offer a fun, low key way to see what others are doing in both free flight and R/C and to test out your models. This year, Loren Schmidt, honorary SAM 27 member and our annual Crash & Bash host, will

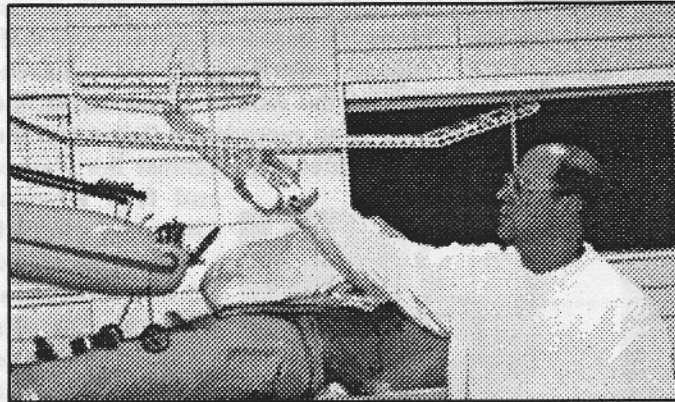

Don Bekins photo

*Tim Molsberry finished this beautiful 1/2 A Texaco "Hornet", a Canadian O/T design with tissue. The model flew as nicely as it looked.*

Rambler

*VP Rod Persons proudly displays his original design mulvihill unlimited rubber he calls the RHP M-1. Pete Samuelson's rebuilt Folley II in the background.*

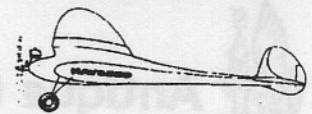

be the R/C CD, taking over from Bill Bowen who started the R/C O/T events at these normally free flight gatherings. Bill, a past SAM 27 member, did a magnificent job for over 5 years and is to be congratulated for his creative efforts for O/T modelers.

#### PICK UP O/T ENGINES!

Prez Ferrario reported there will be a MECA Swap Meet on February 19th at the Oakland Airport Aerospace Museum.

## Show and Tell

January 1994

by John Carlson

John Hlebcars showed a Cleveland kit for a Joe Elgin designed Playboy Sr which sold for \$4.50 in 1949. This was a different kit in that it had 70 in. wing on a standard size fuselage for a .49 size ignition engine, i.e., McCoy 49. John acquired it on a recent visit to the original Cleveland Model & Supply. The owner, ET Packard (now in his 80's) always claimed he designed the Playboy and that Joe Elgin was merely one of the draftsman working for him and putting ET's "exacting specifications" ideas down on paper. In the kit was a greying piece of paper expressing these claims. It is rumored that draftsmen who used to work for Cleveland would try to hide authorship initials on inconspicuous parts of the drawings so they could be later identified as the designers.

Don Bekins displayed an all balsa R/C HLG which Junior member Sky Greenawalt built during his Christmas visit home. Don and Sky flew it from the Tiburon hills where strong upslope winds nearly took it OOS. The small model had a stick fuselage with the Rx and battery strapped on with rubber bands and the servos held on with double sided tape. The control

push rods went back to cardboard surface made from file-folder material. Neat! It was an excellent flyer. Don also showed a finely made Russian diesel engine, 2.5 cc (.15 cu.in.) size, which Sky had purchased on a street corner during a recent school visit to Russia for \$10. He and Don put it on a test stand and it turned 14,000 rpm in a test run on a 9X4 prop. The beautifully machined engine came in a fine molded plastic box with extra wrist pins, tools and fuel line, with instruction in Russian.

Ron Keil displayed a beautifully framed 1/2 A Rearwin Speedster built from an Earl Stahl rubber design. Covering will be mica film in red and white corresponding to the original full size aircraft.

Jerry Rocha brought in a P-30 with which he has had considerable success at several contests. Construction was so light he had to add weight to meet rules weight requirements. The model features a prop free wheel arrangement that Jerry reports has never failed him. A washer is staybrite soldered to the prop shaft between the nose block ball bearing and the prop. Rubber tension pulls the soldered washer up to the ball bearing and the prop thrust keeps the bent front of the prop shaft engaged with the prop. When the tension of the wound motor eases, the prop drag exceeds the thrust and the prop slides back against the washer and free wheels. Clever, but simple!

Remo Galeazzi showed some Japanese tissue samples from JCI, 5829 Los Feliz Dr., Buena Park, CA 90620. Seventeen colors including silver are available at \$1.50 per 17x23 sheet. Quality appears to be excellent. Some of you may wish to check this out.

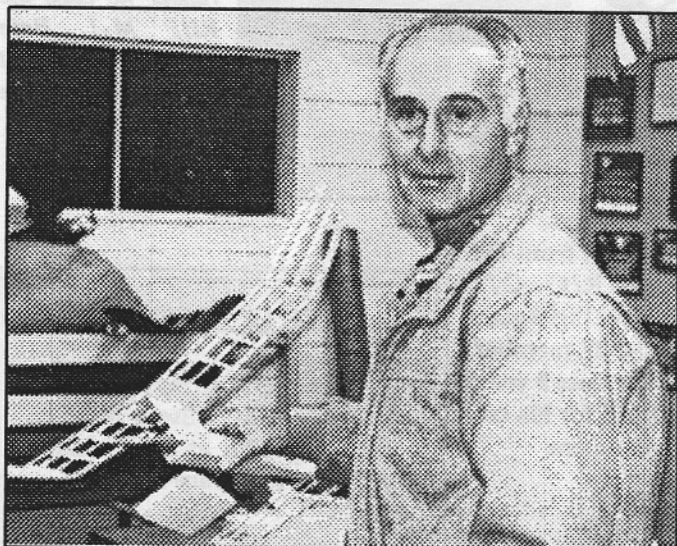

Ray McGowan attended the recent Pasadena Trade

Show and was impressed with an aluminum-zinc alloy welding rod which can be used to repair pot metal or aluminum, requiring only a high pressure propane torch.

Tim Younggren, member of the famous TBT's, showed his newly completed "American Ace" / "New Ruler" electric powered with a Hobby Lobby geared Speed 400 motor. The beautifully crafted model is covered with white silkspan with very detailed black trim. A truly outstanding model awaiting test flying.

### RAFFLE

Prize	Donor	Winner

John Hlebcars photo

Parent of Ken, Leighton Monroe, Jr. proudly displays his nostalgia U-control speed model which did over 100 mph in its prime over 40 years ago

John Hlebcar photo

Our most senior junior member, Mike Keller, 20, has just joined SAM 27's ranks. Mike is perhaps our most famous modeler having won the Junior World FAI free flight championships a few years ago when they were held in Yugoslavia. His dad, Rick, is an old time free flyer and has joined SAM 27 as well.

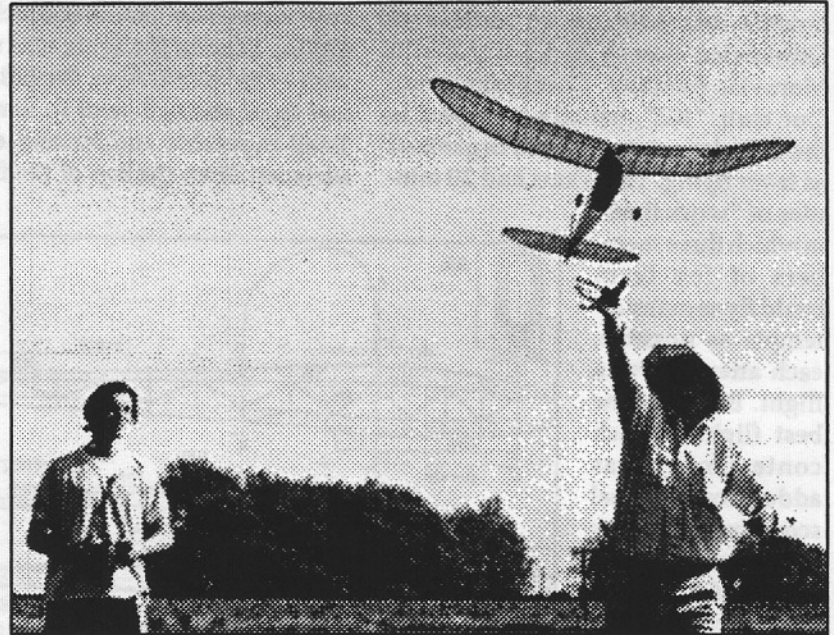

John Hlebcar photo

One of our younger Jr. O/T'ers, Cleve Passarell with his newly completed "Zoomer". It is well built and flies just fine, thank you! Nice going, Cleve!

# Jr. O/T'ers

## Looking to the Future

Don Bekins photo

Junior member Sean Crowley at the controls for the ill-fated launch of his fine flying 1/2 A Playboy. The model had a great flight, but as it got higher and higher becoming hard to see, Sean had some trouble controlling it. The wing folded and down it came. Sean has since rebuilt the model, learning the lesson that O/T wings have to be built with plenty of strength.

### Jr. Old Timers

#### What They Are up To...

- |                 |  |
|-----------------|--|
| Ken Monroe      | <ul style="list-style-type: none"> <li>• Completed "Zoomer", brought to Show &amp; Tell</li> <li>• Completed and tested own design glider</li> </ul>                                       |
| Ryan Dugan      | <ul style="list-style-type: none"> <li>• Is rebuilding Zoomer</li> <li>• Working on a Cloud Chaser and Fox 35</li> <li>• Working on Slow Combat UC</li> </ul>                              |
| Brian Cassayre  | <ul style="list-style-type: none"> <li>• Completed "Stratometer" with silly putty DT and fine folding prop. Good craftsmanship!</li> <li>• Building a P-30 rubber model</li> </ul>         |
| Scott Seronello | <ul style="list-style-type: none"> <li>• Showed motor &amp; controller for Leisure Bomber</li> </ul>   |
| Robbie Stasko   | <ul style="list-style-type: none"> <li>• Rebuilding Zoomer</li> </ul>  |
| Glen Dahl       | <ul style="list-style-type: none"> <li>• Completed Zoomer</li> </ul>   |
| John Elsdon     | <ul style="list-style-type: none"> <li>• Has been flying a Goldberg "Gentle Lady"</li> <li>• Is ready to cover his 1/2A Playboy RC</li> </ul>  |
| Sean Crowley    | <ul style="list-style-type: none"> <li>• Has finished a Fox for a glow</li> <li>• Is completing a Bomber for B glow RC</li> <li>• Working on a Stratostreak for .020 Replica FF</li> </ul> |
| Stavros Wagner  | <ul style="list-style-type: none"> <li>• Continuing work on Zoomer and Cloud Chaser</li> </ul>   |

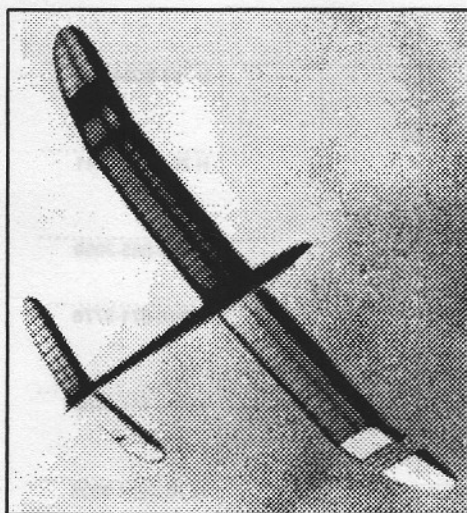

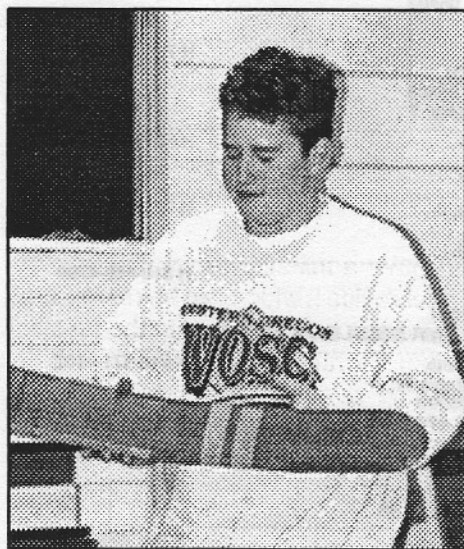

substituted for cane tips; 3/32" sheet should be ok for wing ribs, with 1/4"sq. for the leading edge. A split pushrod system can be used for the dihedral elevators. The model appears to be somewhat simpler to build than the slab sided Thermic 100 and should have similar performance. dmb.

rado cizek photo

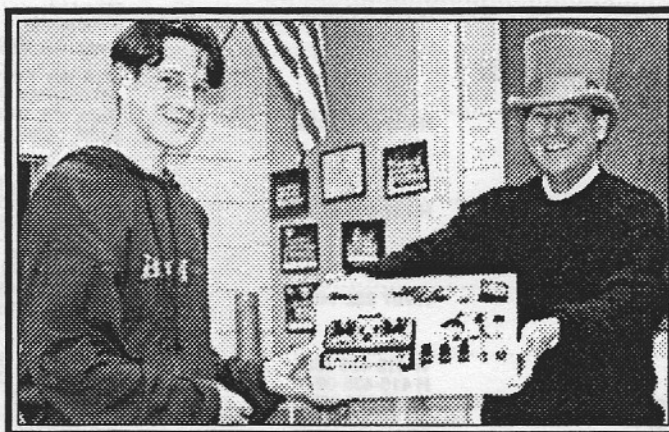

The Zehrovice II gracefully gliding overhead is a 1950 design by our Czech member Rado Cizek. This model qualifies for SAM competition in the Czech Republik. It is a good flyer and is relatively easy to build. It was originally built entirely of spruce and plywood since balsa and other model building material were not available in the eastern block countries. Originally a free flight, it is easily adapted to R/C. See story page 6 about this unusual project.

Brian Cassayre, a consistent winner at our raffles, is busy building, shown here with his tissue covered "Stratometer" wing.

# Print & Pics

by John Hlebcar

Mad-Hatter, Brian Ramsey, in his last act as SAM 27 President, presents the year-end grand raffle prize, a new R/C set, to Sean Crowley, one of our most active Jr. O/T members.

## Next Meeting at Rocco's Classroom February 16, 1994

### Redwood Middle School

# Membership

by John Carlsen

## NEW MEMBERS AND RETURNEES

The junior ranks keep growing. Welcome to Mike Haley and Phil Bates. Past Secy/Treas. Carl Righetti and Herb Malchow just "re-upped". However, we are missing some old regulars who will no longer receive the newsletter include Ned Nevels, Ed Solenberger, Rick Madden, and some of our past non-resident members: Fred Terzian, Steve Roselle, Bill Vanderbeek, George Joki, Dan Lutz, and John Targos, Stan Lane, Bill Bowen and Fred Mulholland. This is going to be an great year for SAM27. We hope the missing will rejoin us for the newsletter,

fun and camaraderie of old timer modeling. The current roster is attached.

Clip out or photocopy this handy application form.

### Membership

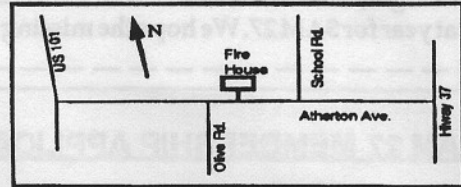

Membership is \$15 for the calendar year. After February, the dues for a new member will be prorated.

Due to increasing cost of publication and mailing, the Associate Member category has been dropped.

Please send dues to John Carlson, Treasurer. Make checks payable to SAM 27.

### Meetings

Membership meetings are held on the third Wednesday of each month at the Novato Fire Department, Training Room, on Atherton Ave. at 7:30 P.M. **Please note change for month of February and map on page 7.**

**PLEASE ADVISE EDITOR OF ANY CHANGE OF ADDRESS**

**Next meeting: Wednesday, February 16, 1994  
Redwood Middle School, Napa, in Room C4  
President Rocco Ferrario's Classroom**

85 Bellevue Ave., Belvedere, CA 94920

February 1994

### First Class Mail

*Remo Galeazzi stands proudly by the nearly complete Fleet biplane he and Ted Babini been restoring for the last three years. Wings and control surfaces are finished, ready for assembly.*
